PROSPECTUS OF THE "NATIONAL MON-UMENT." A weekly journal to be published in Washington, under the sunction of the Washington National

Monument Society. JAMES C. PICKETT, KDITOR AND PUBLISHER The Monument is intended to be a literary, agricultural, and miscellaneous paper. It will contain selections of the literature of the day—the best that can be found in Ameri-

ilterature of the day—the best that can be found in American and English publications: interesting scientificarticles, embracing mechanics; foreign and domestic news; a synopsis of the proceedings of Congress, and every thing that such a journal might be expected to contain, with the exception of party politics, which will be at all times most rigorously excluded.

The Monument will be published for the express and the sole purpose of siding in the exception of the public.

most rigorously excluded.

The Monument will be published for the express and the sole purpose of aiding in the erection of the noble column now rising on the banks of the Potomae, in honor of the Father of his Country, and which every one who venerates the name of Washington would rejoice to see completed. After deducting out of the subscription the expenses of the journal proposed to be published, the remaining funds will be faithfully applied, and without reserve, to the purpose indicated. The aid, therefore, of all who are willing to contribute to so patriotie an object, and one so entirely national, is earnestly requested. By subscribing to the Monument, a valuable journal at a low price may be obtained, while it will be doing something, at the same time, towards completing that majestic memorial of the Nation's gratitude.

The Board of Managers recommend Mr. Pickett, formerly Fourth Auditor of the Treasury and Charge d'Affairs to Peru, who proposes to edit and publish the Monument journal, as one well qualified to perform the duties of editor, and to conduct the paper faithfully, and satisfactorily to the subscribers. They assure their fellow-citizens that this enterprise is not a speculation got up for individual emolument. Mr. Pickett will make the experiment with his own means and at his own risk; if successful, he will receive nothing more, and he asks nothing more, than a very moderate compensation for his services. Not one dollar, therefore, of the direct subscription to the erection of the Monument will be, in any event, applied to the support of the paper, nor the Society in any manner held pecuniarily responsible.

To give the public an idea of what may be done with the journal it is proposed to publish, it may be stated that a list of fifty thousand paying subscribers, at two dollars

ner held pecuniarily responsible.

To give the public an idea of what may be done with the journal it is proposed to publish, it may be stated that a list of fifty thousand paying subscribers, at two dollars cach, will yield, an annual net profit of from fifty to sixty thousand dollars.

The postmasters, and secretaries of all organized bodies throughout the Union, are respectfully requested to act as agents in obtaining subscriptions, thus aiding the great object of our exertions.

As all editors and publishers, on account of the object for which the Monument newspaper will be established, must wish it to succeed, it is hoped that they will contribute to its success by publishing this prospectus.

All moneys will be rematical, and all letters and moneys addressed prepaid, to the general agent of the Monument Society, Hon. Elisha Whittlesey, Washington.

Officers.—Millard Fillmore, an afficio President; Arch. Henderson, First Vice President; Walter Lenox. (Mayor of Washington.) Second Vice President; Walter Lenox. (Mayor of Washington.) Second Vice President; Walter Lenox. (Mayor of Washington.) Second Vice President; Walter Jones. Third Vice President; J. B. H. Smith, Treasurer; Geo. Watterston, Secretary.

Board of Manacars.—Winfield Scott, N. Towson, Thos. Munroe, W. A. Bradley, P. R. Fendall, Walter Jones, Thomas Blagden. Peter Force, W. W. Seaton, M. F. Maury, T. Hartley Crawford, Benj. Ogle Tayloe, Elisha Whittlesey, Terns.—The Monument will be printed on a double-voral sheet—the nancer and type being of the hest areality.

T. Hartiey Crawford, Renj. Ogle Tayloc, Elisha Whittlesey. Terms.—The Monument will be printed on a double-royal sheet—the paper and type being of the best quality— and in quarto form, containing sixteen large pages, that it may be more easily preserved. The price will be two dollars per annum, payable on the receipt of the second number. The nature of the enterprise not admitting of any credit, none can be given.

Societies and clubs will be furnished with the MONUMENT on the following terms: 3 copies for \$5; 5 copies, \$8; 10 copies, \$15; &c.

Those who are disposed to patronise the MONUMENT are requested to forward, their names to the General Accessed.

are disposed to patronise the MONUMENT are equested to forward their names to the General Agent, ithout delay. The first number will be published early a May, and the second on the second day of August, and in May, and the second on the second day of August, and weekly thereafter; time being allowed for the Prospectus to be circulated, and for the agents to make returns. As all subscribers will be contributors to the Monument itself, their names will be published in the paper.

tember 19, 18/8.

THE distinguising merits of this Apparatus are—

Ist. The istenishing it apidity of the process, surpassing belief—tence the name.

24. The Gream during the progress of freezing becomes charge d with atmospheric air, by which it nearly doubles in bulk, and obtains the peculiar smoothness, lightness, ar, delicacy of flavor, for which the Ice Cream of our best Confectioners is so highly prized.

3d. It does not require a tenth part of the labor that the common Freezer does.

4th. It does is work better, producing a better article, in every respect, than by any other mode.

5th. There is a considerable saving in ice, as the tub needs no replenishing during the operation.

The annexed test monial from the Proprietor of the Eulas House will put to rest all doubt.

"Having witnessed the process of freezing Ice Cream in Austria's Magic Freezer, two quarts of Cream having been frozen in the incredible short time of six minutes, I cheerfully recommend it to the public."

"This is to certify, that during the summer of 1848, I used one of Austin's Patent Ice Cream Freezers of the largest size, (10 gallons,) making from 10 to 50 gallons per day during the season; and so far as regards expedition and power, I consider it decidedly the best freezer now in use, as I have had with it no difficulty in making ten gallons of superior quality Ice Cream from five of plain Cream, in thirty minutes from the time I commenced working it.

Newark Academy.

By a late re-organization of this department of Delaware College, the Board of Trustees have taken measures to place it upon a new and improved foundation, and to endow it with advantages possessed by few similar institutions in the country. The Academy, heretofore morged in the College, and of course subjected to all the crils which have been found to attend the amalgamation of the two departments in the same building, and under the same government, now enjoys the privilege of a separate establishment, without losing those which result from its relation to the College proper.

A large and elegant edifice, with all the necessary factures of a complete bearding establishment, has been creeted and furnished, in which the students of the Academy board, under the immediate charge of the Principal and his Assistants; and all its exercises are conducted on a system of its own, uninterrupted by the interests or operations of the other department. The furniture of the study-rooms and dormitories has been chosen with peculiar reference to comfort and convenience for study; and no expense has been spared in providing the apparatus necessary to render the means of instruction complete; giving to Newark Academy facilities for private study and comfortable accommodation of students, fully equal to those afforded by many of our colleges.

From its intimate relation to the College, students of the Academy enjoy many advantages not generally obtained at institutions of this kind. Those who wish to pursue some particular branch which falls more properly within the College course, may be admitted to recite in any of the College course, may be admitted to recite in any of the College scane be profitably enjoyed by academical students.

THE TESTIMONY OF ONE OF OUR LAWYERS.—

Mr. AS. L. HAMILITON.—Draw Sir: Although the number and respectability of the testimonials of which you are already in possession, as to the efficacy of your Medicine, "THE OREAT VA. REMEDY," in the diseases which it is designed to cure, are sufficient, in my opinion, to establish its reputation, and secure for it such patromage as will adequately reward you for the discovery of so these timable as Medicine—yet the great benefit which I have derived from its use, and the salutary effects which I have derived from its use, and the salutary effects which I have derived from its use, and the salutary effects which I have derived from its use, and the salutary effects which I have derived from its use as you may think proper to make of it, this formal acknowledgment of its sanitary virtues. My own case was Drepepsis of long duration, and very aggravated in its character, manifested by an almost total destruction of the digestire functions, great debility, ner yousness, emaciation, and impaired appetite, with pain, and a burning sensation in the left side of the chest, palpitation of the heart, vertige and congestion in the head, and many other symptoms indicative of the worst type of the disease, by the use of three or four bottlee of your preparation, been entirely relieved. The cases of my friends, in which your Medicine was taken, were Dyspepsia, Chronic Headsche, and Sore Throat, in all of which it proved effectious, after the trial of a vest number of other remedies without benefit. Your medicine is as pleasant to the taste as a cordial, and in my experience corrects all derangement of the stomach, restores the wasted or enfecible energies of the digestive organs, and imparts strength and reanimation to the whole system.

Very respectfully, yours, &c.,

English Common Law Reports,

58 Folumes, with a complete Index to the first 47 Volumes.

Since volume 39 of this series, The English Common Law
Reports have been reprinted in full. With volume 44, we
commenced binding each English volume separately, instead of, as formerly, two English in one American volume.

Price—For the first 43 vols., \$3 50 per vol.

For the succeeding, 2 50 "

The reputation which these Reports maintain in England and in the United States is known to all the Profession. The low price at which they are offered, compared
with the rates of some of the priacipal American Reports,
of even inferior merit, recommends them particularly to
the attention of those purchasing Libraries.

General Index to the first 47 Vols. of the English Common Law Reports.

lish Common Law Reports.

By Hon. Gencar Sharswoon and George W. Biddle, Esqrs. 1 vol. 8vo.—\$6 90.

With this Key to their contents, the English Common Law Reports present to the Profession a mass of legal learning in the shape of Opinions, Data, elaborate Arguments, &c., &c., sufficient, probably, for the Elucidation and Prosecution or Definice of say case, that can arise in our Courts of Law; and being thus made casily and instantly accessible, these Reports will be found so comprehensive, convenient, and cheap, as to supersede the necessity of other or more expensive scales.

The Index will be found of great value to all possessing the Reports; and of great convenience to those having access to, but not owning the series.

CAMBRIDGE, January 25, 1845.

Gentlemen: Your letter of the 24th has been received, in which you ask my opinion as to the value of the English Exchequer Reports, from Price downwards to this time, to an American Lawyer, and as to the expediency of reprinting them in this country. Of the high value of these Reports, both on the Pleas and Equity sides of the Court, I have not the least doubt—the decisions of this Court for the last fifteen or twenty years, both at Equity and in Common Law, being entitled to equal respect with any others in England. I should think an American Lawyer's Library essentially incomplete without them.

In Prince William county, Virginia. He is still destrous of seiling, and will do so on accommodating terms.
It consists, first, of 94% acres of land, in from two and a
half to four miles of Brentsville, the county town, fourteen miles of Occoquen, thirty miles of Alexandria, and
from four to five miles of the Orange and Alexandria Raifroad, which will be completed to Brentsville this
year. This had is well adapted to the growth of wheat,
corn, rye, cats, and grass. It is a mixture of the red and
grey soil, and admirably adapted to improvement by the
use of clover, plaster, guano, &c. It is heavily timbered,
and finely watered, flaving fasting springs of the purest
water. It is capable of being divided into five or six good
sized farms, and with tolerable buildings and small orchards on four of hem. It will sell it all in a body to a
company, or will divide it to suit purchase money in
hand, and the balance I will divide in three annual payments, to bear interest from the date of sale, to be secured
on the property. Land is rapidly rising in value in the
neighborhood, and I offer great inducements now, as I
wish to turn my attention to other pursuits.

Secondly. A square of buildings in the town of Brentsville, suitable for a carriage-maker, wheelwright, or blacksmith, with two dwelling-houses, kitchens, blacksmith,
carriage, and wheelwright shops, and other necessary
buildings. \$1600 is now my price for this property—ou
the same terms as the land. It is within a mile and threequarters of the railread.

Thirdly. Nine and a quarter acres of land on the turnpike, just above Buckland, on which are a good dwellinghouse, a large wheelwright shops, kitchen, stable, dairy,
and smokehouse. It would make a good tavern stand,
and the shop a good stable. For this property I will take
\$500—on the same terms.

Sixthly. A valuable farm in Alleghany county, Maryland, containing 200 acres, within eight miles of the National Road, and ten to twelve miles of the Baltimore and ohie Raifroad. This farm is in a thriving neighborhood, is heavily timbered, has a good and never-faifing stream of water running through it, and several mill-seats; abounds in iron ore and coal; has a fine sugar maple orchard on it, and a mineral spring, which I think equal to the White Sulphur of Beifford, and has now some forty or fifty acres of the land cleared. The soil is not surpassed by any in the country. I am disposed now to take \$4 per acre for it. Mr. Abraham Steel, who lives near it, will show it to any one wishing to purchase. The property in Prince William county, Virginia, will be shown by Eppa Hunton, esq., who is authorized to sell; or by Mr. Edwh W. Latimer, or Mr. Robert Hodgkin. I shall be in Brentsville about the middle of May, and will, in person, show the property to any one wishing to purchase.

FURNISHING MAIL LOCKS AND KEYS.

Post OFFICE DEPARTMENT,
March 14, 1851.

Theing desirable to substitute locks and keys of some of the United States, specimen locks and keys, with proposals to furnish the same, will be received and considered at the Post Office Department until the first day of July next. The different locks will be submitted to a commission for examination and report. Upon this report, contracts will, as soon as practicable, be entered into for furnishing such locks and keys for four years, with the right on the part of the Postmaster General, for the time being, to extend and continue the contract in force for an additional term of four years, by giving to the contractor a

iracts will, as soon as practicable, be entered into for furnishing such locks and keys for four years, with the right on the part of the Postmaster General, for the time being, to extend and continue the contract in force for an additional term of four years, by giving to the contractor a written notice to that effect, not more than nine nor less than six months before the termination of the first term of four years.

With a view of procuring the best lock at the lowest price, no kind of lock is prescribed as a standard, the Department relying for a selection on the mechanical skill and ingenuity which a fair competition, now invited, may develop. It is, however, proper to state that a lock suitable for the mail service should possess the following qualities, viz: durability, uniformity, lightness, and strength. For the purpose of displacing simultaneously all the mail locks and keys now in use, about thirty thousand new locks and twenty thousand keys adopted thereto will be required to be furnished by the contract of within seven months after the contract shall have been entered into; afterwards the annual supply will depend on the durability of the locks and keys adopted, as well as the increase of the mail service; but it will probably never exceed in amount three thousand of the former and one thousand of the latter.

No lock will be considered if it be like any already in general use; nor will any one with whom the contract may be made be allowed to make, sell, or furnish, any lock or key similar to those contracted for for any other purpose or use than that of the Post Office Department.

The kind of lock adopted must be patented, and the patentee will be required, on entering into contract, to make an assignment of his patent for the exclusive use and benefit of the Department. The kind of lock adopted must be patented, and the party or to fulfi faithfully the terms and conditions of his contract, the Postmaster General and people, and for the region of the locks and keys.

The work has been enlarged since its commencement in July, 1859, and each volume now contains finds than series hundred large octave pages. A few complete sets of the Magazine may be obtained at the publisher's office, 142 Fulton street, New York, neatly and substantially bound, for two dollars and a half per volume.

The following are a few of the many commendatory letters received by the editor of the Merchants' Magazine from distinguished statements:

Letter from the Hon. Heart Clay.

Extract of a letter from Hon. Millard Fillmore.

"I have read it (Merchante Magazine) with a good deal of attention, and have no hesitation in saying that I think it one of the most valuable periodicals that was ever published. To the merchant it seems and repository o

where so well digested and so accessible as in these numbers. I only regret that I do not own the whole work."

Letter from the Hon. Thomas H. Benton.

Washinston City, April 20, 1849.

Mr. Freeman Hunt.—Sir: I owe you many tissues, for the opportunities I have had to east the Merchants' Magazine, and have found it in reality to be a magazine, said that well replenished, of all the useful matter which the title would imply, and presented with a fullness and clearness which delights while it instructs. It is, is fact, a merchants' magazine in the large acceptation of the term—merchants who go between nations, whose large operations bring many departments of knowledge, and a view of the state of the world, into daily requisition. But it is not the great merchant only, but the one of more modest, but, nevertheless, of most useful operations—the merchant of the interior also—who will find this magazine to abound with the information the pursuit of his business and the elevation of the mercantile character requires. Nor is its utility at all confined to merchants, but extends to the legislator and diplomatist, and to all who are charged with managing the safairs of the nation. For myself, I have found it most useful to me in my senatorial labors, and have been in the habit for many years of carefully consulting it.

Very respectfully, sir, your obedient servant, THOMAS H. BENTON.

Cold Spring Watter Cure.

This New And Splendid Establishment for the scientific treatment of the various diseases with which the human system is afflicted, is situated about three miles from the city of Buffalo, in a rural spot, and so accessible from all points as to be reached without inconvenience or delay.

A line of omulbuses runs from the steamboat landings in Buffalo to the springs every ten minutes.

The house and grounds are near the extensive and beautiful green-houses and nurseries of the Messrs. Hodges & Bryants; and the scenery in all directions is uneurpassed, as regards either variety or beauty; embracing points of view, from which may be taken in at a glance the broad expanse of Lake Erie, the Niagara flowing majestically towards the Falls, extensive forests, and the "Queen City of the Lakes," with its moving panorams of steamboats and ceaseless enterprise.

The water, taken immediately from the celebrated "Cold Spring," is unsurpassed as regards coldness and purity, by any in the United States. The house, recently erected at a cost of about seven thousand dollars, has been fitted up in a neat and elegant style, at considerable extra expense, and is sufficiently capacious to accommodate seventy-five patients.

Connected with the establishment, and constituting one of its attractions, are the fixtures and conveniences for innocent and healthful gymnastic exercises.

A return from a wide and fatal departure from the simplicity of Nature's laws is called for, alike by a rational love of happiness and the deplorable exigencies of our condition. Hydropathy, or a scientific use of water as a restorative and curative agent, is a practical substitution of a simple and remarkably efficacious mode of curing the sick; for that system of drugsging, depleting, and cauterizing, which, in obtaining the mastery over disease, too frequently places the patient beyond the reach of further annoyance. The secess of the various Water Cure establishments in this country, to say nothing of any other, has fully confirmed the hopes of the early discoverers and promulgators of the great truths upon which the system is founded, and renders verbal communications unnecessary. It is deemed sufficient to say, that the "Cold Spring Water Cure" will compare favorably with any of the well-conducted establishments of a similar character, and will be found equal to the best, as regards the order, convenience, and desirableness of its arrangements. The institution is now open for the reception of patients, and in full operation.
